### Other information

: Data of sections 4 to 8, as well as 10 to 12, do partly not refer to the use and the regular employing of the product (in this sense consult information on use and on product), but to liberation of major amounts in case of accidents and irregularities. The information describes exclusively the safety requirements for the product(s) and is based on the present level of our knowledge. The delivery specifications are contained in the corresponding product sheet. This data does not constitute a guarantee for the characteristics of the product(s) as defined by the legal warranty regulations. Dioxins:  
The material may contain traces (parts per trillion, ppt) of naturally occurring dioxin species (PCDD, PCDF) including TCDD (2,3,7,8-tetrachlorodibenzodioxin). TCDD was classified by the IARC in Monograph 69 (1997) as a known human carcinogen. If this material is used for food, feed or cosmetic purposes, it is highly advisable to check whether it complies with the requirements of the applicable legislation, in particular with regard to the dioxin content. On 25th April 2006, a convention was signed across all sectors on protecting the health of employees through good handling and use of crystalline silicon dioxide and products containing it. This autonomous agreement, which was supported financially by the European Commission, is based on a guide about tried-and-tested practices. The terms specified in the convention came into force on 25th October. The convention was published in the official European Union journal (2006/C 279/02). The convention text, its appendices and the guide on tried-and-tested practices can be viewed at <http://www.nepsi.eu> and offer useful information and instructions on handling products that contain fine fractionated crystalline silicon dioxide. Literature references can be obtained from EUROSIL (the European Association of Industrial Quartz Manufacturers).

This information is based on our current knowledge and is intended to describe the product for the purposes of health, safety and environmental requirements only. It should therefore not be construed as guaranteeing any specific property of the product.
