TTS-Autoline

Pneumatic manipulator

By using TTS-Autoline as a gadget for TTS-90, you are able to work without a balancer. Thanks to adjusting its weight and height of the linear guide unit perfectly for the TTS-90, it can be moved by hands very easily.

TTS-Autoline offers many benefits:

1. No patrons and mandrels, no clamping, no damage of the inner pipe surface, no deterioration of the eroded collets, etc.
2. You can weld pipes with an inner diameter of 1mm minimum
3. Easy handling: Clamp all three axes by using just one shifter.
4. Easy adjusting of the whole construction (elevating screws at its feet, turning devices at its weld head attachment with toggle levers)

DATA //

Measurements

beginning from the ground:	600 mm
X-Axis:	1.500 mm
Y-Axis:	1.000 mm
Z-Axis:	450 mm
weight:	230 kg
Dimesions:	2.080 x 1.010 x 1.080 mm
