# FLEX STONE

A modern building with a large, curved, colorful stone panel sculpture in the foreground. The sculpture is made of a material that looks like stone but is flexible, as it is curved into a shape that would not be possible with natural stone. The colors are vibrant, with shades of blue, yellow, and brown. The building in the background is a multi-story structure with large windows and a balcony. A bicycle is parked near the building. The overall scene is a mix of natural and man-made elements.
