CAPACITIVE SENSORS • LABEL SENSORS

Capacitive proximity switches are contact-free sensors. They detect metallic and non-metallic objects, regardless of whether they move or not. The achievable sensing range of the devices depends on the object material, its dimensions and the response sensitivity, which is set via a potentiometer. The vibration-resistant sensors can be approached laterally or frontally. Capacitive proximity switches are used for presence detection (e.g. sealing detection), positioning (e.g. PET bottles), counting (e.g. plastic caps), level detection (e.g. lubricant) or distance measurements (e.g. thickness measurement) of solid and liquid materials.

MECHANICAL FEATURES

Ambient temperature (MAX)	60 °C
Degree of protection (IP)	IP65
Fork width	1 mm
Housing coating	Anodized
Housing design	Cuboid
Housing material	Aluminum
Mechanical mounting condition for sensor	Non-flush
Pressure-proof	-
Sensor height	36 mm
Sensor length	24 mm
Sensor width	100 mm

ELECTRICAL FEATURES

Cascadable	-
Max. output current	200 mA
No-load current	70 mA
Rated control supply voltage U_s at DC	10 V ... 35 V
Setting procedure	Teach-In
Suitable for safety functions	-
Supply voltage	10 V ... 35 V
Switching distance	1 mm
Switching distance	1 mm ... 1 mm
Type of electrical connection	Connector M12
Type of switching function	Exclusive-OR
Type of switching output	PNP/NPN
Voltage drop	2.5 V
Voltage type	DC
With monitoring function of downstream devices	-

OTHER FEATURES

Detection of labels	+
Level detection	+

Other

Packaging dimensions	99.0mm x 60mm x 160mm
Shipping weight	0.23kg
Tariff code	85365019

Classification

ipf product group	243
eClass 8.0	27270102
eClass 9.0	27270102
eClass 9.1	27270102
ETIM-5.0	EC002715
ETIM-6.0	EC002715
ETIM-7.0	EC002715

Connection

Dimensional drawing

Installation

Mounting / installation may only be carried out by a qualified electrician!

Disposal

Software

Please download the software or driver required for operating your new device on our homepage: www.ipf.de

Safety warnings

Before initial operation, please make sure to follow all safety instructions that may be provided in the product information. Never use these devices in applications where the safety of a person depends on their functionality. LED lighting systems can generate intensive UV radiation, which can damage your eyes in case of improper use. The manufacturer cannot be held responsible for damages that result from improper use or connection.
