"Kendi cildim gibi doğal görünümlü düzeltme"

Formül, şeffaf pembe dokusu ile şeftali tonlarında bir aydınlatıcı etkiye sahiptir. Pembe tonu aşırı yoğun değildir ve nötr bir his verir, bu nedenle herhangi bir cilt tonuna uyum sağlayarak uyumsuz görünmez~ İnce bir tabaka halinde uygulanmasına rağmen, gün boyu kalıcı, nemli ve güzel bir cilt dokusu yaratmak için mükemmeldir~ Fondöten kullanmadığınız günlerde veya günlük makyaj rutininizin bir parçası olarak ideal olacaktır :)

"Parlak ve sofistike görünümlü bir cilt!"

Lotion gibi pürüzsüz bir şekilde kayar, topaklanma, yumrulanma veya lekelenme yapmaz; birden fazla uygulama gerekmez. Makyaj yapmamış olmama rağmen, bu tonlayıcı güneş kremi cildimi anında aydınlattı ve canlandırdı. Donuk, lekeleri olan çıplak cildim en az on ton daha açık görünüyor.

Sadece tonu değiştirmek bile büyük bir fark yaratıyor. Alın ve elmacık kemiklerim sağlıklı ve doğal bir ışıltıya sahip, cildim inanılmaz derecede sağlıklı görünüyor.
