- As a result of the examination and analysis, the above-mentioned values were determined.
- No part of this report may be used alone or separately. Unsigned and unsealed reports are invalid.
- Analysis results are valid for the above-mentioned sample received. Sampling is not performed by our laboratory.
- When necessary, "Measurement Uncertainty" and "Recovery" rates are given with the analysis result. The uncertainty of measurement does not include the uncertainty of measurement resulting from sampling. In the case where measurement uncertainty is used, the coverage factor for expanded measurement uncertainty is the value found by multiplying k=2 and provides 95% confidence.
- It cannot be used for legal and administrative proceedings and for advertising purposes.
- Abbreviations; E: Evaluation P: Pass, F: Fail, N.I.: Not Interpreted, R.: Recovery, M.U.: Measurement Uncertainty, LOD/LOQ: Detection Limit / Limit of Quantification
- For feed samples, the results were calculated taking into account the 12% moisture content.
- Test and/or measurement results, expanded measurement uncertainties (if any) and test methods are given on the following pages, which are an integral part of this certificate.
- This report may not be copied or reproduced in whole or in part without the written permission of the Laboratory.
- # The conclusion and declaration of conformity do not analytically meet the definition of residue.
