ORGANIC & HANDMADE

www.babytoly.com

HELLO 😊

Welcome to Babytoly Organic Cotton Yarn Collection!

Not in any stage of production of Babytoly products seeds containing GMOs, pesticides, toxic fertilisers, dyes containing formaldehyde or heavy metals are used.

The whole production process meets the GOTS (Global Organic Textile Standard) and our products are certified as “**organic**” according to international audit companies. Our social and ecological production philosophy is also applied with respect to the “**fair trade**” regulations. Each production stage of Babytoly from the processing, manufacturing, hand-knitting to printing, packaging, labelling is generated through ecofriendly and sustainable production techniques.

Babytoly organic cotton yarns turn into very soft, healthy and hygienic products due to their supersoft quality and natural content. All the knitwear products and amigurumi play products that are made of our Babytoly organic cotton yarns never cause any allergic reactions, pilling and itching on babies and body skin. Thanks to its premium organic cotton quality all knitting activity would become an excellent knitting experience.

We are so excited to meet you...
